***"YOU WILL LOVE THE WAY
YOUR ULTIMATE SPA***

LOOKS IN YOUR GARDEN"

The ultimate in luxury, comfort and massage

Sunrise Spas knows you have many choices and understands your investment in a spa is one that should not be taken lightly. Whatever your individual reasons are to start enjoying the benefits of living the spa lifestyle, we are committed to exceeding your expectations.

Although many spas may look similar, they are not built the same. Throughout your journey we encourage you to educate yourself, and then compare the design and construction techniques of an Ultimate spa.

Strength and stability from the inside out

Every Ultimate spa starts with a solid foundation. Our indestructible Molded Polymer Base seals out critters and moisture while sealing in the heat, but is also a feature that is unique to Sunrise Spas.

Integrated into the Molded Polymer Base is our galvanized steel frame. Engineered to provide the strength and stability required to support over 3200 kg. Unlike wood frames, our galvanized steel structure is built to last. Not only is it 10 times stronger than wood, it will not crack, warp or rot and unlike wood it will not sustain termites or rodents.

The use of molded plastic corners ensure that every frame is assembled easily, quickly and always to factory specification.

The third component of our system is the Molded Polymer Cabinet system. It provides superior insulating properties and unprecedented sound blocking characteristics. In addition to being completely resistant to rotting, cracking and peeling, our "Click Change Cladding" allows easy future color changes.

Green Guard Roxul Insulation

Every Sunrise spa is insulated with our proprietary Green Guard Roxul Insulation.

This method of insulation captures and recirculates the spa's own heat energy throughout the interior cabinet, reducing the demand on the heater – saving you money.

Other benefits of our proprietary insulation:

- ✓ Won't absorb or retain moisture, like traditional spray foam insulation does, preventing mold and mildew build-up.
- ✓ Superior noise absorption makes Sunrise hot tubs some of the quietest spas on the market.
- ✓ Is inorganic and will not provide a food source necessary for bacteria or small animals to consume.
- ✓ The R-value of this insulation is 8, the same level required when making homes climate neutral.

Spa Equipment

Superior control by Balboa watergroup

An advanced, state of the art spa controller provides the ultimate in ease of use, safety and reliability for every spa user. The Powerworks™ with M7 technology is a revolutionary new hardware/software platform that completely eliminates mechanical sensor switches and remote through-wall temperature sensors.

The M7 platform features two identical solid state sensors that mount inside the heater manifold. These “Smart Sensors” accurately and reliably measure water temperature while monitoring critical water conditions without the possibility of failure due to mechanical switch malfunction.

Titanium heater

The Titanium heater contains no iron and will not rust or corrode. The material does not need to be coated to protect it against chemicals; titanium produces a dioxide film that continually migrates to the surface, making it withstand scaling and extending the product lifetime.

Designed to last

Technically and functionally superior, your Sunrise Spas hot tub has been designed in association with medical and engineering professionals to deliver years of trouble-free enjoyment.

Every aspect of the spa, from its structure to the mechanical operation, is recognized as industry leading. Additionally over 300 quality control check points are personally inspected by in-house engineers to ensure every step of the manufacturing process is up to the standards our reputation demands.

Weathershield Cover

- ✓ 100% polyester, polyurethane backed to stop absorption of water
- ✓ Inhibits the growth of mildew and mold
- ✓ It is not only lighter and stronger than standard Vinyl, it also has a higher consumer appeal
- ✓ Using recyclable materials makes this cover environmentally superior

Smart Touch Panel

The Sunrise Spas advanced SmartTouch control panels are easy to read and allow you, with the tap of your finger, to change the temperature, adjust lighting or control your massage. Unlike your smart devices this control works even when wet.

Wireless Connectivity

The Balboa Water Group Control My Spa feature allows you access to your hot tub anywhere in the world where you have an internet connection to your mobile device. It provides a full interface control to set the temperature, turn pumps & lighting on and off, set filtration cycles and monitor your spa while you are away.

Power Saver Pump

This special pump is used for spa heating and filtration, only using 1A when doing so, increasing the level of energy efficiency, while still providing an intense massage when the High Speed is switched on. Only available on the Ultimate Collection.

AquaNova UV + Ozone Spa Sanitizer

Technology

With the unique combination of ozone (O₃) and UV-C technologies, AquaNova is the ultimate solution for water sanitation in one compact and simple system. Providing the water quality and spa care one could expect from chlorine/salt water systems, AquaNova has more sanitizing power, better reliability, and less hassle, all while significantly reducing residual chlorine consumption to deliver the most advanced sanitation potential available.

Innovation

The Patent Pending built-in venturi injector system provides superior water – ozone – uv mixing for even greater water quality. It will also save you space, time and money in production costs. Simply plumb one tube in and one tube out. No separate injector plumbing required. Built-in fault detection and lamp life timer software takes the guesswork out and ensures the system is operating at its optimum.

How it works

The ozone is produced first, and then exposed to UV light. Once exposed to the UV light, the O₃ is converted to hydrogen peroxide, which is further converted to hydroxyl radicals. As an oxidizer, hydroxyl radicals have been found to be more potent than hydrogen peroxide or ozone and much more powerful than chlorine. This is true synergy in that the whole is greater than the sum of its parts. Scientists conducted an experiment to determine if using UV and ozone together results in better bacterial reduction than UV or ozone alone. Scientists have found that the amount of UV & ozone needed to complete this task was far less when used together, than when used alone.

Personalized Comfort and Style

The Ultimate U1 Spa offers enviable personalized features which include an ultra-comfortable zero gravity lounge seat, a 22-point controlled body therapy seat with dual pressure controls, a two-seat couples relaxation zone, and a shiatsu massage chair next to a lighted tranquility fountain with a Zen inspired cascading waterfall.

Shiatsu Massage Chair

A total of 11 jets, including 3 large LED-Glo jets tiered down the center of the back, and 8 perimeter jets following the side contours of the back for deep tissue massage.

22-Point Controlled Body Therapy Seat

With dual pressure controls, this seat lives up to its name providing 22 points of Therapy, including 6 across the back, 10 along the thighs and calves, then 2 armrest jets and 4 footplate jets delivering reflexology therapy to wrists or hands, plus the balls and heel of each foot. Includes 6 LED Glo-jets.

Dual Height Couple's Relaxation Zone

Two side by side seats set at two different heights, providing 8 jets each for the back, varying from large to shiatsu sized, and directly across a multi-jet reflexology dome for a relaxing foot massage. Includes 2x 3 LED Glo-Jets.

Zero Gravity Lounge

A total of 20 jets provide 2 levels of massage pressure, neck-to-foot massage action. Includes 8 jets for upper, middle and lower back comfort, along with 10 thigh and calf jets, plus 2 jets providing reflexology therapy to the bottom of your feet. Jet sizes vary from large to shiatsu sized for deep tissue massage. Includes 8 LED-Glo Jets.

Quad filter Auto Clean Water Management

Delivering consistent easy care and water management, the auto clean water management system combines filtration and a sanitization system resulting in a virtually self-cleaning spa. Filtration action through four proprietary anti-microbial filters, powered by the extremely energy efficient Power Defender single amp pump, is teamed up with the AquaNova Dual UV/Ozone Sanitizer System to ensure unwanted elements are removed and your water is kept clean and clear.

The antimicrobial filters are built with Advanced Point Bonded Filtration Fabric and are enhanced with an exclusive antimicrobial agent that is infused into the filtration fabric itself unlike the standard cartridges. This technology inhibits the growth of dangerous microbes and provides continuous, durable and effective added protection for the lifetime of the product to ensure the health, safety and well-being of your family.

'Clear and clean water'

Music to your ears

The Ultimate Collection is complemented with a fully integrated Bluetooth audio system. Listen to your favourite tunes playlist or stream music from your smart device and control it from the convenience of easy to use menus.

Fully Integrated Speakers

Eight integrated speakers provide crisp clear fidelity for your listening enjoyment, the placement of these speakers ensures a surround sound experience.

Audio Entertainment

Enjoy an unprecedented amount of choice when it comes to entertainment. With millions of songs to choose from, you can easily stream them through the Bluetooth connection without relying on any additional hardware! Pick some mood music or easily personalize a family member's favourite station or playlist while you relax in the hot tub, and enjoy an immersive musical experience!

Subwoofer

Music is not complete without the feel. With the powerful subwoofer, integrated directly into your spas structure, sound will resonate through the spa, so you don't only hear but also feel your music.

ACRYLIC OPTIONS

Every Sunrise Spas hot tub has an attractive interior finish made from continuous cast acrylic, produced by the renowned manufacturers of Lucite® and Perspex® acrylic sheet. This is superior to Ethylene, 'soft plastic' surfaces. The hard, non-porous surface resists stains, fading, scratches and chemical abuse. With the look of granite, pearl or metalescence, the extremely rugged and durable finish offers beauty and peace of mind.
