

SUNRISE SWIM

COLLECTION

SUNRISE SWIM SPAS

THE SWIM JET SYSTEM

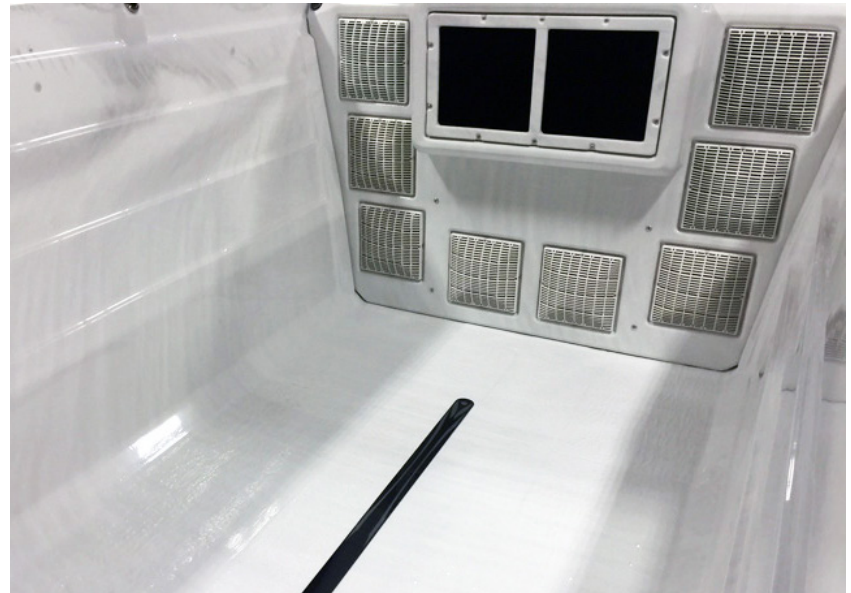

Vitality™ Series and JetSwim™ Series swim spas are powered by powerful swim jets and provides ample space for a full swim or exercise routine, limitless family fun, or a calming night under the stars. Enjoy the perfect combination of health and wellness.

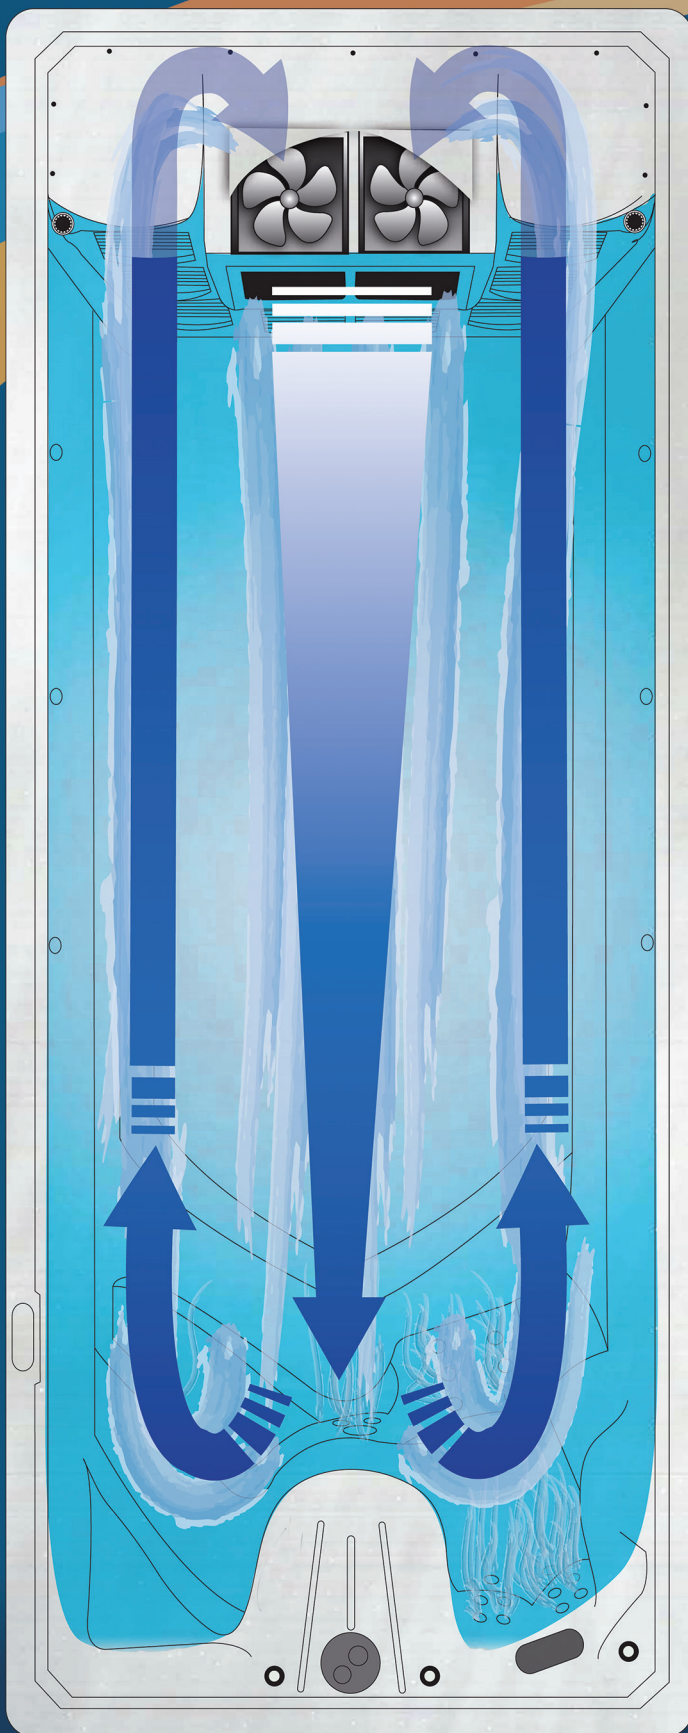

SWIM SPAS

THE PROPULSION SYSTEM

Our dual propeller design provides the widest, smoothest swim spa path of any other swim spas. The nearly 3 1/2 foot exceptionally wide flow path is large enough and powerful enough for any level workout. The side-by-side propellers deliver a powerful resistance current through the unique honeycomb grates to remove uneven turbulence.

SWIM SPAS

**PATENT
PENDING**

TruSwim
TECHNOLOGY
By Sunrise Spas

Wider Path, Smoother Path, Better Workout

Our patent pending dual propeller design provides the widest, smoothest swim spa path of any other swim spa. The even resistance from this unique TruSwim™ system provides exceptional balance and power for athletes of any level. The nearly 3 1/2 foot exceptionally wide flow path is large enough and powerful enough for any level workout.

The side-by-side propellers deliver a powerful resistance current through the unique honeycomb designed grates removing uneven turbulence, keeping the propulsion smooth and balanced. Marathon and competitive swimmers who have used other swim spa brands confirm the TruSwim™ hydraulic propulsion system delivers an unparalleled swim experience.

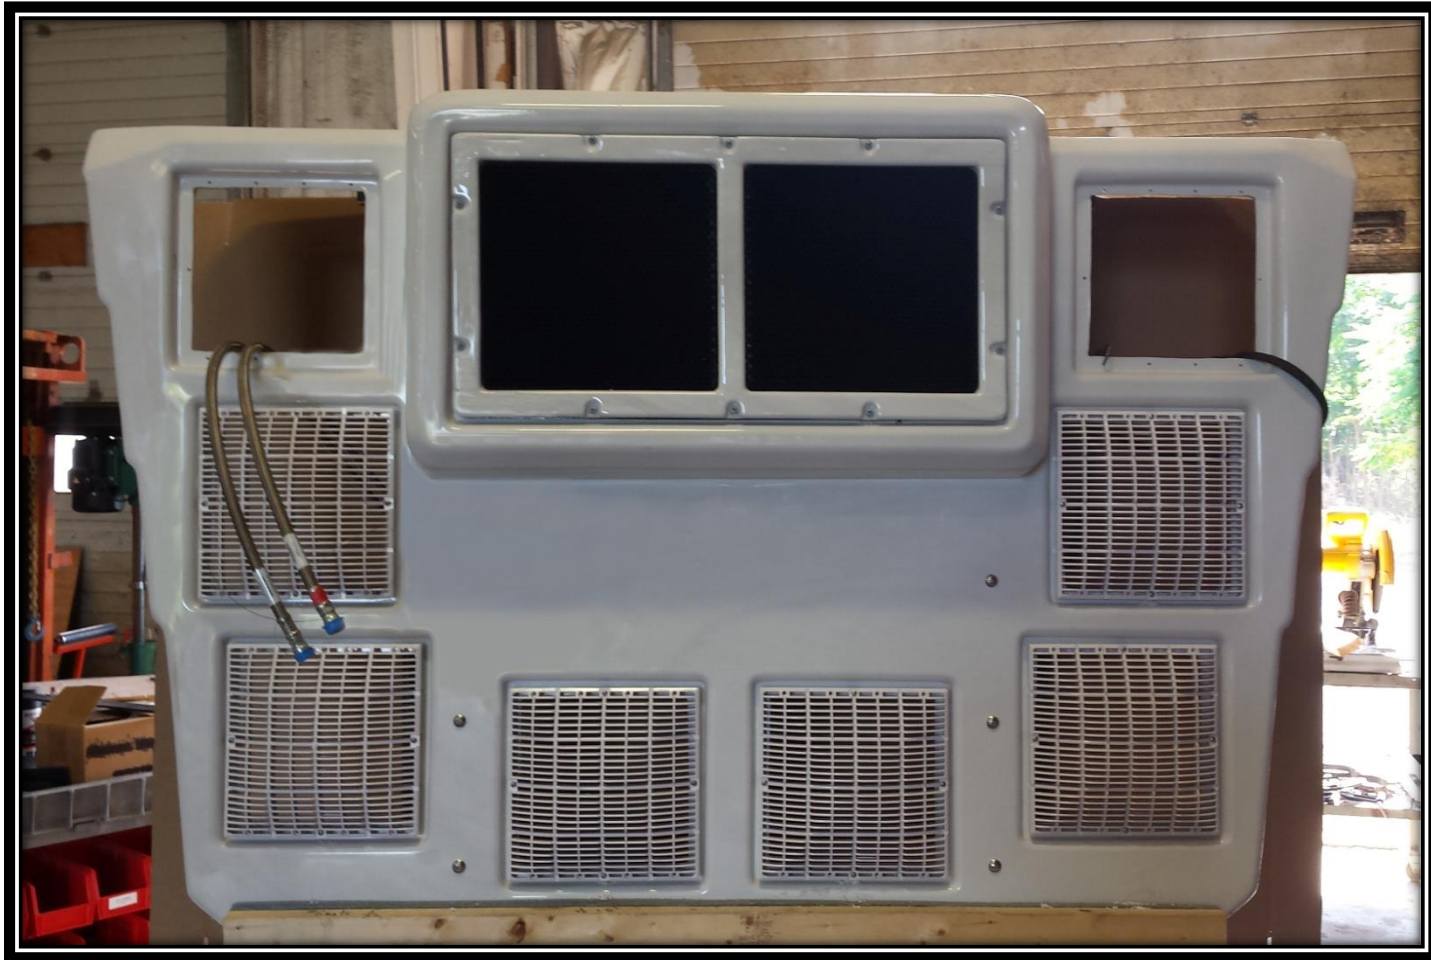

Wall Assembly

TruSwim Wall Overview

- The TruSwim wall is fiberglass reinforced vacuum formed acrylic part that is custom fit to the swim spa that it is being inserted into.
- System uses twin propellers to create current
- All metal used in fabrication of the wall is stainless steel
- The two hydraulic motors that are used are coated to prevent rusting
- Stainless Steel Nonconductive Hydraulic Lines

HEAVY DUTY WOODEN SUPPORT STRUCTURE

The JetSwim and TruSwim spas are built with a heavy duty wooden support structure to ensure durability and structural integrity.

ABS TRAY WITH FOAM

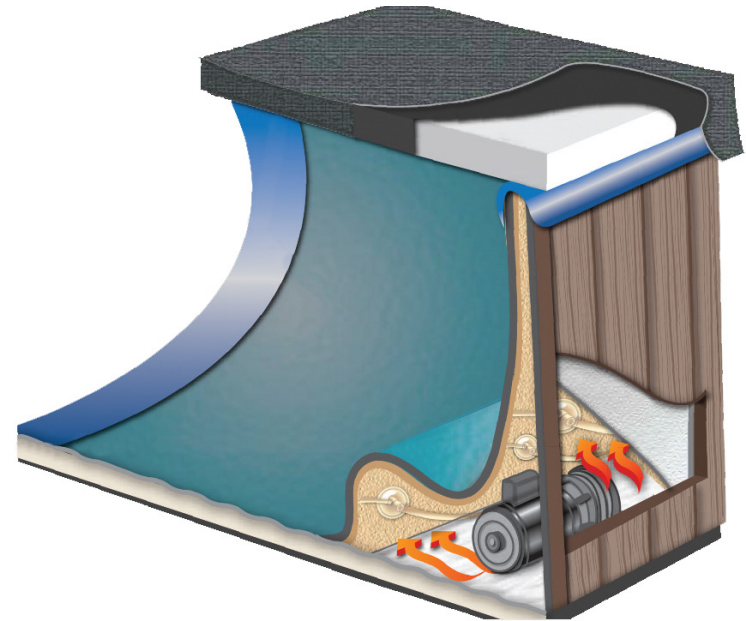

The base of the spa is elevated by the ABS tray to keep the inside of the spa away from the damp, cool ground. The layer of foam and plywood adds extra insulation thus making the swim spa more efficient.

GREEN-MINDED INSULATION SYSTEM

The insulation system is a green-minded innovation, recycling trapped warmed air from pump waste heat to efficiently keep your unit warm and ready for use in any season. Warmed air is trapped within the cavity behind the cabinet walls and the insulated base to efficiently warm the plumbing and backside of the swim spa.

Our insulation design continues to insulate and provide efficient means to future servicing for the life of the unit.

SWIM SPAS

DESIGNER SERIES CABINET

In a sea of look-a-likes, the exclusive Designer Series Insulated Cabinet stands apart with stylish cabinet touches such as dark accent strips, corners and a matching thermal cover. The cabinet colour is carefully chosen to complement your home and outdoor room decor in any season.

SWIM SPAS

SWIM SPA

STANDARD FEATURES

CASCADING WATER SPOUTS

The overall ambiance is enhanced with the soothing sounds of waterfalls made from the cascading water spouts.

STANDARD FEATURE

SWIM SPAS

DELUXE THERMAL LOCKING COVER

The thermal cover seals firmly to your swim spa's coping; significantly reducing operating costs and assisting in keeping your water chemistry in balance.

STANDARD FEATURE

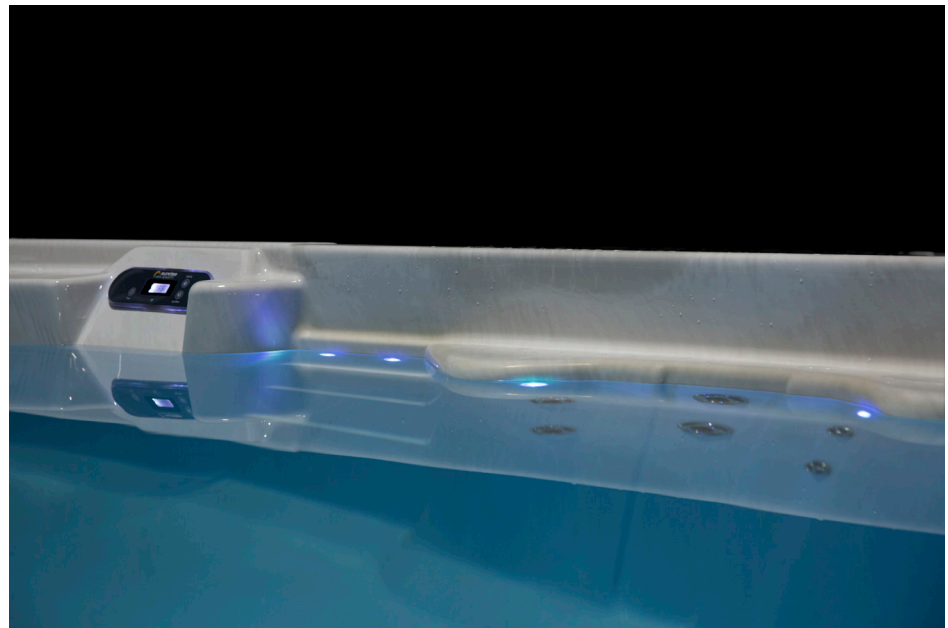

SWIM SPAS

UNDERWATER LIGHTING

Enjoy your favourite mix of colour! The luminescent LED underwater and perimeter lighting effects create a dramatic glow below the waters' surface that accompanies the LED main light.

STANDARD FEATURE

SWIM SPAS

SWIM SPA

OPTIONAL FEATURES

BLUETOOTH AUDIO SYSTEM

Control your spas audio wirelessly with the Bluetooth audio system and listen to your favourite songs through our waterproof speakers and powerful subwoofers.

OPTIONAL FEATURE

SWIM SPAS

CABINET SCONCES PERIMETER LIGHTING

Light your way with the LED exterior cabinet lighting. There are sconces that emit light all around the perimeter of the cabinet making it easier to see the spas surroundings.

OPTIONAL FEATURE

SWIM SPAS

AQUABALANCE STAINLESS GRAB BARS

Improve control and expand your routine options with AquaBalance. These 2 additional grab bars are located on each side of the swim spa to promote balance and assist with a variety of underwater movements and exercises. These bars provide added safety to your swim spa.

OPTIONAL FEATURE

SWIM SPAS

MOTIONMAT FLOOR MAT

Stylish and safe, the non-slip MotionMat provides exceptional comfort and traction for all aquatic activities. The mat provides optimum surface for walking, jogging and other exercises.

OPTIONAL FEATURE

SWIM SPAS

AQUAFORCE PULLY SYSTEM

The versatile AquaForce system offers a range of exercises to target upper body and core muscle groups. Customize your workout from beginner to advanced with ropes above water to under water adding resistance and intensify your training.

VITALITY - Standard Feature

JETSWIM - Optional Feature

TRUSWIM - Optional Feature

SWIM SPAS

AQUACROSS TETHER SYSTEM

The AquaCross system enhances a variety of fitness and swim routines to increase muscle and burn more calories. This tether provides counter resistance and stability to boost your training effectiveness and improve swim technique.
