***“Turn your garden
into an oasis of wellness
and relaxation...”***

Care-Free Enjoyment!

Our hot tubs are hassle-free, easy to operate & definitely luxurious.

At Sunrise Spas, we are committed to superior craftsmanship and luxury at an affordable price. We use the latest innovations to maximize your hot tub experience and minimize your maintenance needs.

We understand that a spa for your home is a significant investment, so we've built every one of our spas with materials that will last a lifetime. Plus, we've made maintenance and operating easier and less expensive, with a proprietary insulation and filtration system.

Classic Collection Features

Safety Features

- 1 • LED safety light
- 2 • Easy entry steps

Ambiance & Entertainment

- 3 • LED lit deck controls (SX-collection)
- 4 • Audio-system (optional)
- 5 • LED Exterior Ambiance Lighting
- 6 • LED Interior Lighting
- 7 • Soothing LED waterfall

Massage & Comfort

- 8 • Powerful hydrotherapy pumps
- 9 • Neck collar massage
- 10 • Comfort pillows
- 11 • Multi-level seating

Efficiency Features

- 12 • 9,3 m² filtration surface
- 13 • Deluxe keypad & controls
- ✓ • Rockwool insulation
- ✓ • 13 x 8 cm heat saver cover

Strength and stability from the inside out

Every Classic spa starts with a solid foundation. Our polyethylene ABS Capped Bottom Tray seals out critters and moisture while sealing in the heat.

Integrated into the ABS Capped Bottom Tray is our galvanized steel frame. Engineered to provide the strength and stability required to support over 3200 kg. Unlike wood frames, our galvanized steel structure is built to last. Not only is it 10 times stronger than wood, it will not crack, warp or rot and unlike wood it will not sustain termites or rodents.

The plastic corners ensure that every frame is assembled easily, quickly and always to factory specification.

The third component of our system is the polysteel cabinet system. The polysteel system provides superior insulating properties and unprecedented sound blocking characteristics. In addition to being completely resistant to rotting, cracking and peeling, our maintenance free cabinet has the look and feel of real wood.

Green Guard Roxul Insulation

Every Sunrise spa is insulated with our proprietary Green Guard Roxul Insulation.

This method of insulation captures and recirculates the spa's own heat energy throughout the interior cabinet, reducing the demand on the heater – saving you money.

Other benefits of our proprietary insulation:

- ✓ Won't absorb or retain moisture, like traditional spray foam insulation does, preventing mold and mildew build-up.
- ✓ Superior noise absorption makes Sunrise hot tubs some of the quietest spas on the market.
- ✓ Is inorganic and will not provide a food source necessary for bacteria or small animals to consume.
- ✓ The Rc-value of this insulation is 8, the same level required when making homes climate neutral.

Spa Equipment

Superior control by Balboa watergroup

An advanced, state of the art spa controller provides the ultimate in ease of use, safety and reliability for every spa user. The Powerworks™ with M7 technology is a revolutionary new hardware/software platform that completely eliminates mechanical sensor switches and remote through-wall temperature sensors.

The M7 platform features two identical solid state sensors that mount inside the heater manifold. These “Smart Sensors” accurately and reliably measure water temperature while monitoring critical water conditions without the possibility of failure due to mechanical switch malfunction.

Titanium heater

The Titanium heater contains no iron and will not rust or corrode. The material does not need to be coated to protect it against chemicals; titanium produces a dioxide film that continually migrates to the surface, making it withstand scaling and extending the product lifetime.

Designed to last

Technically and functionally superior, your Sunrise Spas hot tub has been designed in association with medical and engineering professionals to deliver years of trouble-free enjoyment.

Every aspect of the spa, from its structure to the mechanical operation, is recognized as industry leading. Additionally over 300 quality control check points are personally inspected by in-house engineers to ensure every step of the manufacturing process is up to the standards our reputation demands.

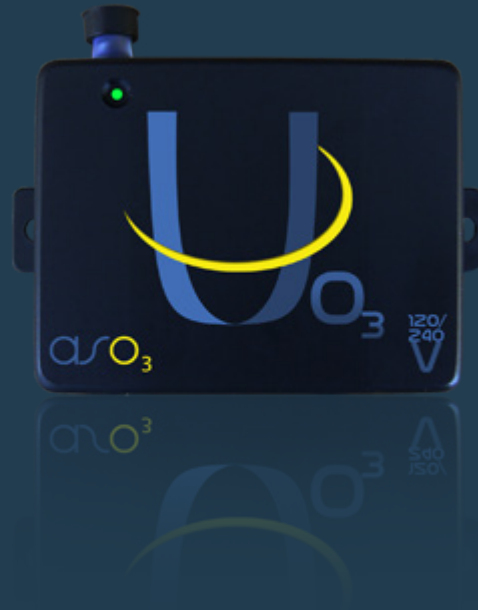

Control Panel

This system comes with a sleek control panel. It has a simple, yet extensive menu and the intuitive user navigation makes it easy to set the spa the way you like. It has a large back-lit LCD screen, reading easier than ever.

Aqua Sun Ozone*

Aqua Sun Ozone water purification system will automatically maintain healthy, crystal clear water while greatly reducing chemical maintenance. Aquazone is a Corona Discharge ozone system that disinfects and cleans your spa water.

WaterWay 2.2Kw Dual Speed Pump

Designed with two speed motors that have four sets of insulated windings for increased efficiency and a 56-frame motor for added strength, cooler operating temperature and longer motor life.

Wireless Connectivity*

Sunrise Spas now puts your spa's controls in the palm of your hand. Simply download the free app, sync to your home's WiFi system and enjoy complete control. Preset temperature, set filter cycles to save money, or get it ready from the comfort of your home before heading out to enjoy a relaxing spa experience.

*Optional

AquaNova UV + Ozone Spa Sanitizer*

Technology

With the unique combination of ozone (O₃) and UV-C technologies, AquaNova is the ultimate solution for water sanitation in one compact and simple system. Providing the water quality and spa care one could expect from chlorine/salt water systems, AquaNova has more sanitizing power, better reliability, and less hassle, all while significantly reducing residual chlorine consumption to deliver the most advanced sanitation potential available.

Innovation

The Patent Pending built-in venturi injector system provides superior water – ozone – uv mixing for even greater water quality. It will also save you space, time and money in production costs. Simply plumb one tube in and one tube out. No separate injector plumbing required. Built-in fault detection and lamp life timer software takes the guesswork out and ensures the system is operating at its optimum.

How it works

The ozone is produced first, and then exposed to UV light. Once exposed to the UV light, the O₃ is converted to hydrogen peroxide, which is further converted to hydroxyl radicals. As an oxidizer, hydroxyl radicals have been found to be more potent than hydrogen peroxide or ozone and much more powerful than chlorine. This is true synergy in that the whole is greater than the sum of its parts. Scientists conducted an experiment to determine if using UV and ozone together results in better bacterial reduction than UV or ozone alone. Scientists have found that the amount of UV & ozone needed to complete this task was far less when used together, than when used alone.

Hydrotherapy jets

A variety of jet sizes and internal styles are used in unique seating patterns to achieve superior hydrotherapy in individual spa models. Therefore, not every jet described or pictured below is in every model. Not all jet internal styles are available in all jet sizes.

To adjust the water volume, simply turn the jet face clockwise to the off position or counter clockwise to the maximum position. If you move too hard to maximum you will release the internal from the jet body.

Lighting

LED Lit Waterfall

Enjoy a relaxing massage while listening to the soothing sounds of the LED lit waterfall.

LED interior lighting

Enjoy your favourite mix of colour! The luminescent LED perimeter lights create a dramatic effect below the waters' surface.

LED exterior lighting

Gives atmosphere to your garden thanks to multi-coloured corner lighting.

*LED Lit controls & cupholders**

The luminescent LED lit deck controls create a dramatic effect paired with the LED lit cupholders.

*Optional

Weathershield Cover

- ✓ 100% polyester, polyurethane backed to stop absorption of water
- ✓ Inhibits the growth of mildew and mold
- ✓ It is not only lighter and stronger than standard Vinyl, it also has a higher consumer appeal
- ✓ Using recyclable materials makes this cover environmentally superior

Music to your ears

Audio Entertainment*

Enjoy an unprecedented amount of choice when it comes to entertainment. With millions of songs to choose from, you can easily stream them through the Bluetooth connection without relying on any additional hardware! Pick some mood music or easily personalize a family member's favourite station or playlist while you relax in the hot tub, and enjoy an immersive musical experience!

Fully Integrated Speakers

Four fully integrated speakers provide crisp clear fidelity for your listening enjoyment, the placement of these speakers ensures a surround sound experience.

Subwoofer

Music is not complete without the feel. With the powerful subwoofer, integrated directly into your spas structure, sound will resonate through the spa, so you don't only hear but also feel your music.

COLOURS

Acrylic Options

Every Sunrise Spas hot tub has an attractive interior finish made from continuous cast acrylic, brought to you by the renowned manufacturers of Lucite® and Perspex® acrylic sheet. This is superior to Ethylene, 'soft plastic' surfaces. The hard, non-porous surface resists stains, fading, scratches and chemical abuse. With the look of granite, pearl or metalescence, the extremely rugged and durable finish offers beauty and peace of mind.

Cabinet colours

Sunrise Spas Polysteel Exterior Cabinetry is a state of the art wood-alternative material that has the look and feel of natural wood without the maintenance. The material is impact resistant, impervious to weather or insect damage and will never splinter, crack or rot. The attractive exterior locks in heat and seals out cold air - providing a beautiful look and feel.
